Data source reload

Reload subscription data example:

- 1. Open terminal
- 2. Active virtualenv (source ./env/bin/active)
- 3. cd./report-runner
- 4. ipython -i console.py
- 5. Enter below command:

from dm.dm_builder import build_external_subscription_data sql_batchs+=build_external_subscription_data(args) sql.batch_execute_sql(conn,sql_batchs)

Data structure

| Columns Name | Description |
|-----------------|--|
| Туре | Metric type (Churn, Active subscriberetc.) |
| Resolution Type | Daily, Weekly, Monthly |
| Country | Hong Kong, Singapore |
| Platform | IOS IAP, Redemption, Android IAPetc. |
| Start Date | |
| Meta 1 | Plan Code |
| Meta 2 | Channel Name (equal to platform) |
| Meta 3 | Channel sector |
| Meta 4 | Payment status |
| Meta 5 | N/A |
| Meta 6 | N/A |
| Meta 7 | N/A |
| Meta 8 | N/A |
| value | |

Excel formula (GETPIVOTDATA)

GETPIVOTDATA ("value",'Active subscriber'!\$A\$5,"Resolution

Type","daily","Platform","Redemption","Start Date","1/25/2017","Meta 1","Samsung Galaxy

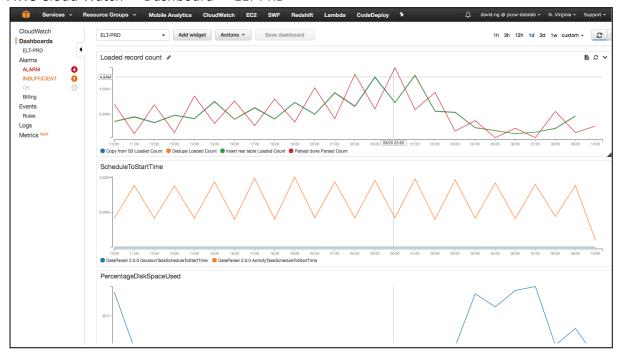

Tablet Promotion","Meta 2","Redemption Campaign","Meta 4","Paying")

SQL expression:

```
SELECT
      value
FROM
      'Active subscriber'!$A$5
WHERE
      "Resolution Type" = 'daily'
AND
      Platform = 'Redemption'
AND
      "Start Date" = '1/25/2017'
AND
      "Meta 1" = 'Samsung Galaxy Tablet Promotion'
AND
      "Meta 2" = 'Redemption Campaign'
AND
      "Meta 4" = 'Paying';
```

ELT Monitoring

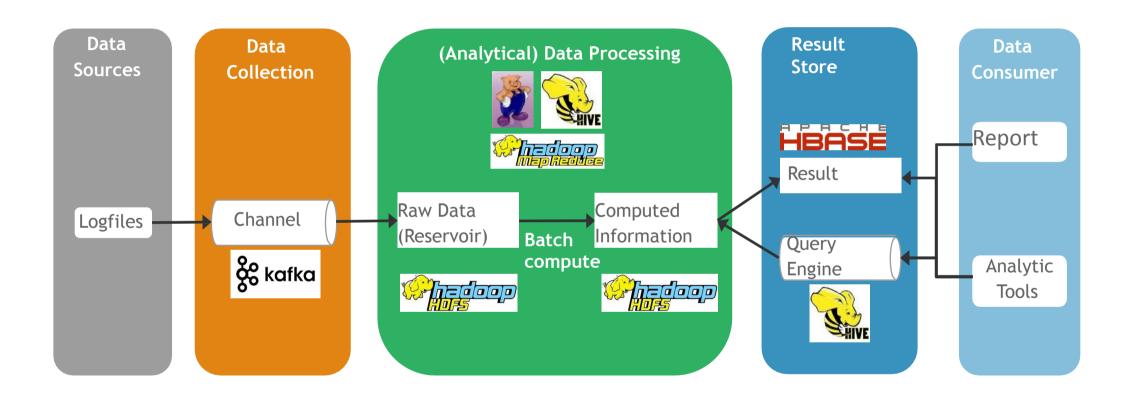

AWS Cloud Watch -> Dashboard -> ELT-PRD

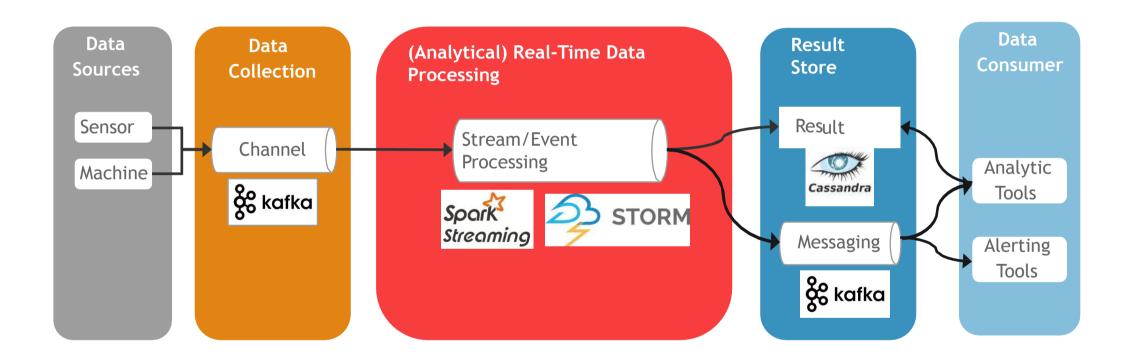

Key Factors to Consider in a Big Data Analytic Solution

- Latency
- Keep raw and un-interpreted data "forever" ?
- Volume, Velocity, Variety
- Ad-Hoc Query Capabilities needed?
- Robustness & Fault Tolerance
- Scalability

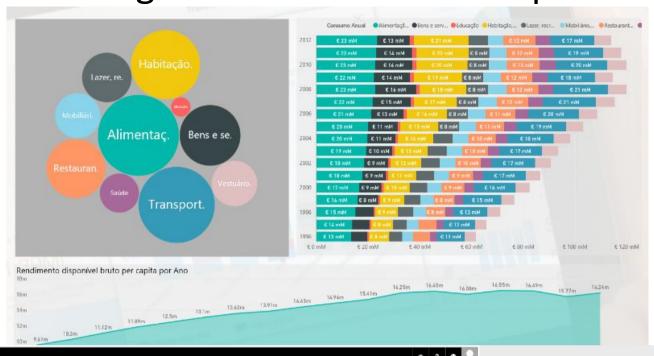

Batch Computing Big Data Analytic Process

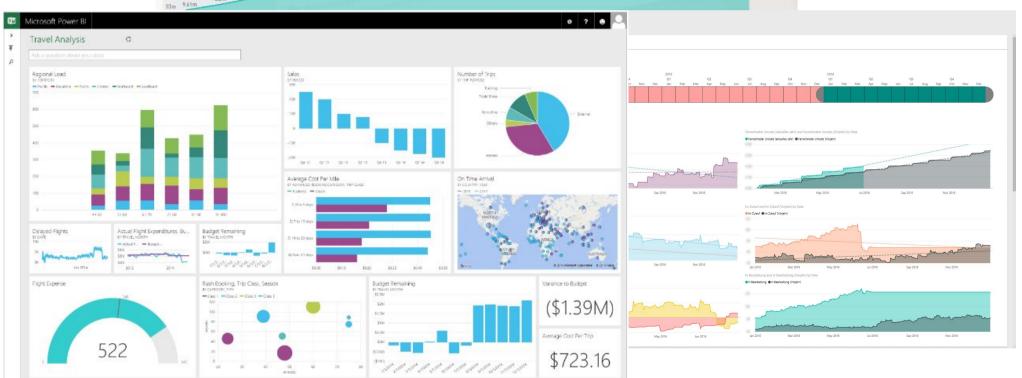

Real-Time Analytics and Alerting on Sensor Event Big Data

Big Data Dashboard Examples

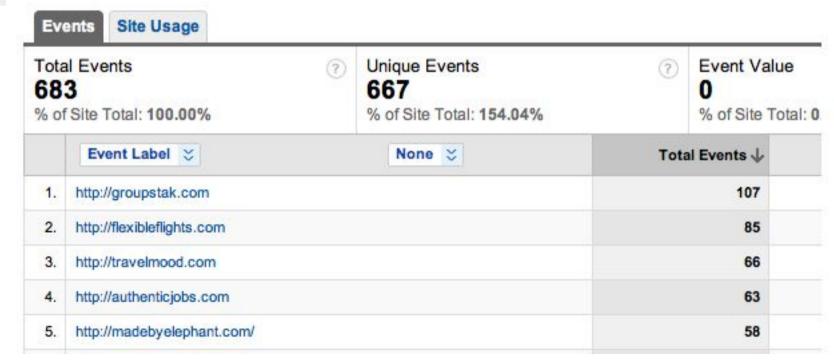

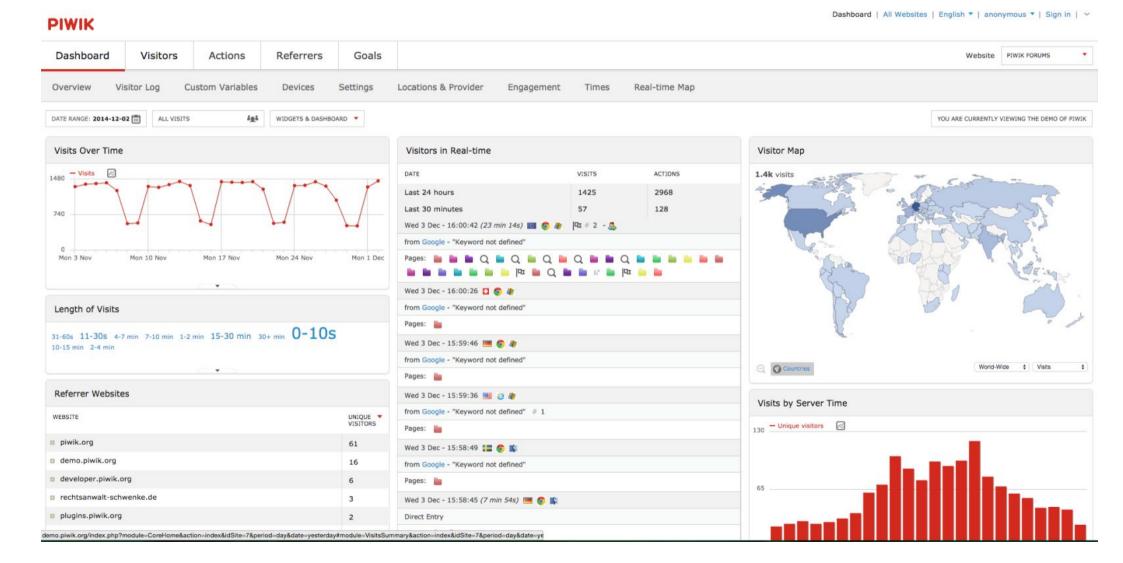

Track exiting traffic of website and app

Adding event tracking by using JQuery

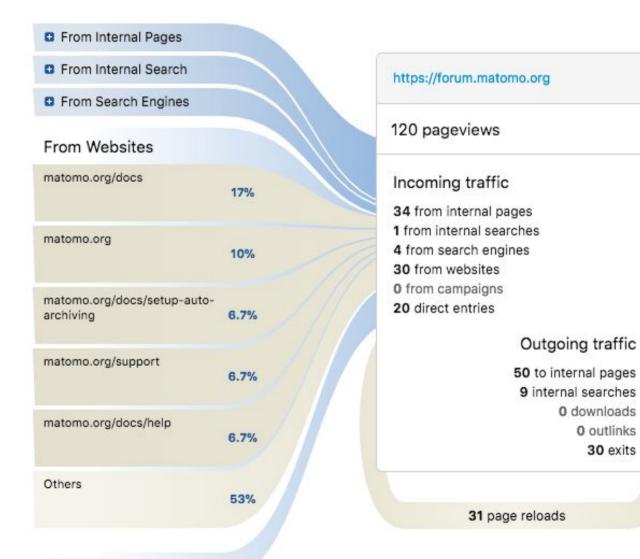

```
$.expr[':'].external = function(obj){
  return !obj.href.match(/^mailto:/)
  && (obj.hostname != document.location.hostname);
};
```

Analytic Platform
